

JESLIN J. P

FULL STACK DEVELOPER

jeslin3379@gmail.com | +91 7538805407 | github.com/jeslin-star-14 | linkedin.com/in/jeslin-jp-9652b8371

PROFESSIONAL SUMMARY

Full Stack Developer with practical experience in building responsive web applications, mobile applications, database-driven systems, and real-world client projects. Strong foundation in Java, Python, C, and C++, with hands-on expertise in React, TypeScript, Tailwind CSS, PostgreSQL, MongoDB, UI/UX design, and Ubuntu-based deployment using SSH. Experienced in developing solutions from requirements and interface design through backend integration, database implementation, testing, and deployment. Passionate about creating scalable, intuitive, and user-focused software solutions.

EDUCATION

Karunya Institute of Technology and Sciences B.Tech in Computer Science and Engineering	2025 – 2029
Holy Angels Matric Higher Secondary School Higher Secondary Education	2023 – 2025 82%

EXPERIENCE

CCS Info Tech <i>Java Full Stack Developer Intern</i> - Gained practical experience in Java full stack application development and software engineering practices. - Worked with frontend and backend integration while developing application functionality. - Applied debugging, testing, and problem-solving techniques in a professional development environment.	May 2026
CodSoft <i>Mobile Application Developer Intern</i> - Developed mobile application components and implemented core application functionality. - Worked on interface development, debugging, and application performance improvements. - Gained practical exposure to mobile application development and software development workflows.	Feb 2026 – Mar 2026

PROJECTS

ARK Kitchen — Full Stack Web Application - Designed and developed a real-world full stack web application based on client and business requirements. - Developed the backend using Python and implemented responsive frontend interfaces with a strong focus on UI/UX. - Built responsive and user-focused interfaces to provide a consistent experience across devices. - Managed application deployment on Ubuntu using SSH and handled the project through development to deployment.	Jan 2026 – Apr 2026
ER Hospital Scheduling System - Developed a database-driven hospital scheduling system with dedicated interfaces for Doctors, Nurses, and Patients. - Designed role-specific workflows to support scheduling and hospital management operations. - Applied database concepts and PostgreSQL for structured application data management.	
Smart India Hackathon — Rural Offline Learning Platform - Participated in Smart India Hackathon with a solution focused on improving education accessibility in rural areas. - Proposed an offline learning platform designed for students with limited or unreliable internet connectivity.	
Solar Cooker — Arduino Hardware Project Developed a solar cooker prototype using Arduino and integrated hardware components with programmed control logic.	

CERTIFICATIONS

• Red Hat Linux Certification	• Google Cloud Digital Leader
• Cisco Introduction to Cybersecurity	• Cisco HTML, CSS, JavaScript and Python

TECHNICAL SKILLS

Programming Languages	Java, Python, C, C++
Frontend & Backend	React, TypeScript (TSX), Tailwind CSS, Python, Java, API Integration
Databases,	PostgreSQL, MongoDB, Ubuntu, SSH, Git, GitHub, UI/UX Design, OOP, Problem
Deployment & Tools	Solving, Debugging
